

First Aid

Summary: responsible for caring for the health of the DART team

Detailed description: The primary task is to care for the health of the DART team and is responsible for the medical kit as well as the locating of doctors and hospitals in the disaster area. This can be someone with nursing experience who at the same time takes another role on the team.

Main tasks:

- medical care of the DART team
- together with the spiritual guide, take care of the wellbeing of the team members
- contact with medical organizations and institutions

Activities (this is not an exhaustive list):

- responsible for locating local doctors and hospital, as well as for finding out information about what to do in case of emergency
- have the phone number and address of closest doctor and/or hospital easily accessible
- support and advise team leader in case of medical issues
- responsible for the medical care of the team members
- responsible for the medical kits that are specifically for the DART team
- write medical reports (after-care)
