

WASH (Water, Sanitation and Hygiene) Coordination

Summary: responsible for establishing WASH equipment and solutions in a DART mission; must be trained in water, sanitation and hygiene

Detailed description: in disaster areas without access to clean water, an expert might be needed who can install and handle appropriate filtration systems. S/he needs to instruct the beneficiaries about their usage and maintenance in order to ensure long-term water security in the disaster area.

Main tasks:

- install clean water filtration system
- teach locals/beneficiaries how to install/use filtration systems

Activities (this is not an exhaustive list):

- ensure that water sources for DART members are safe for drinking
- coordinate the need of filtration systems with the team leader and logistics person
- find appropriate target areas and target groups that will receive filtration systems
- install and handle appropriate filtration systems
- organize distribution of small filtration systems
- teach recipients the usage and maintenance
